[00:00:00.000 --> 00:00:36.762]

Speaker 2 : Pact in us, education and global health, a global health because of some new vaccines that we've been involved with and those I've really gotten out. We swung for the fences there and actually it succeeded, education's been a lot tougher where, although we've done some good curriculum and done some things for tutoring and kids getting feedback, and if we don't have at the drop out rate the graduation preparedness. Still, you know the systems is not dramatically improved and no, where near as good as we want to be.

[00:00:36.762 --> 00:00:41.667]

Speaker 1 : I feel like you always seem to swing for the fences in general,. It's gone sort of a new way of framing it.

[00:00:42.194 --> 00:00:49.739]

[Overlapping Conversations] Speaker 1 : I have to ask if you are swinging for the fences, what if you miss well, hopefully at you, get more than one swing.

[00:00:50.819 --> 00:01:04.722]

[Overlapping Conversations] Speaker 2 : Either at the same problem like in a multiple malaria vaccine construct, so that, if you have two or three, the combine chance of success is much higher or that you're working in multiple areas, not just one area.

Audio excerpt at: D:/Study/Sem7/Final Year/Output/Trial1/AudioExcerpt007.wav

[NOISE]

Audio excerpt at: D:/Study/Sem7/Final Year/Output/Trial1/AudioExcerpt008.wav

[00:01:05.009 --> 00:01:19.869]

Speaker 2 : In a climate for example, have a company that's been trying to make a nuclear actor that would be very cheap and that would have safety so that the public would be very accepting of it.

Audio excerpt at: D:/Study/Sem7/Final Year/Output/Trial1/AudioExcerpt009.wav

[00:01:19.869 --> 00:01:43.992]

[Overlapping Conversations] Now you know even I realize that's high risk. You know less than fifty percent chance. All that comes together and yet ah, if it did and the only reason I'm involved is it would really help with climate. Ah, let us generate electricity without any greenhouse gases. I 'via, a quote from you on climate, from the annual letter and I- think it's pretty guess. I read, quotes back to people from.

[00:01:45.256 --> 00:02:00.020]

Speaker 1 : But this is something you wrote: tackling climate change is going to demand historic levels of global

cooperation. Is that I guess one of the biggest challenges of climate change, there's always ways to innovate and take and innovate, um and other fields, but is the.
